Interpreting the Bible’s Creation Narratives

Scripture, Communication, Language and Culture

1. The Bible is an ancient text, but we don’t treat it like one.

2. Any act of communication only has meaning within a particular language and historical/cultural context.

   Effective communication requires a body of agreed-upon words, terms, and ideas, a common ground of understanding. For the speaker this often requires accommodation to the audience by using words and ideas they will understand. For the audience, if they are not native to the language and cultural matrix of the speaker, this means reaching common ground may require seeking out additional information or explanation. In other words, the audience has to adapt to a new and unfamiliar culture.

   JOHN WALTON
   ANCIENT NEAR EASTERN THOUGHT AND THE OLD TESTAMENT

3. Reading the Bible is a cross-cultural experience. We have to step into a different cultural worldview to understand it.

   • This determines the meaning of words.
     - “Earth” in Genesis 1:1 means “land” not “globe.”
     - The raqia in Genesis 1:6 means “solid dome above the keeps the rain waters elevated.”
     - Cosmic geography in the Bible: three-tiered universe.
   • This determines the types of literature (genre) the biblical authors chose.

   The framers of creation in the Bible inherited a treasure trove of venerable traditions from their cultural neighbors. Instead of creating their accounts ex nihilo, the composers of Scripture developed their traditions in dialogue with some of the great religious traditions of the surrounding cultures, particularly those originating from Mesopotamia and Egypt, as well as those of their more immediate Canaanite neighbors.

   SEVEN PILLARS OF CREATION: THE BIBLE, SCIENCE, AND THE ECOLOGY OF WONDER
   (OXFORD UNIVERSITY PRESS, 2010).

The Bible’s creation narratives

• They are not in dialogue with modern scientific ideas about world origins.
• They are in dialogue with Egyptian, Babylonian, and Canaanite cosmologies.
4. In that dialogue, Genesis 1-3 shows many similarities with other Ancient Near Eastern cosmologies but also many key differences.

5. What is an Ancient Near Eastern Cosmology?
   - These types of narratives do not, as their primary purpose, have to give a scientific account of world origins.
   - They do, as their primary purpose, have to address basic worldview issues: who are we, where are we, why are we here, who are the gods?

A Thesis Statement

The early chapters of Genesis accurately present two accounts of cosmic and human origins in the language and ideas of the ancient Hebrews. These texts should not be removed from their ancient context and read as if they refer to the process of cosmic or human origins in 21st century scientific terms. They speak in terms of an Ancient Near Eastern perception of the world, and should be interpreted within that setting. When we discern the meaning of the texts in their ancient context, we find that they constitute a worldview statement about God and his relationship to the world, and about humans and their relation to God and the world. This basic worldview statement transcends its ancient cultural setting, and commands the attention of God’s people in all places and all times.

(INTERVARSITY PRESS, 2010).

Interpreting Genesis 1-3 as Ancient Israelite Cosmology

1. Genesis 1:1-3: order out of chaos
   - “Beginning” (resheet): “an unspecified period of time in the past”
   - “Heavens and earth” (shamayim vaeretz): sky and land
   - “Formless and void” (tohu vavohu): ‘wild and waste’; these are words that refer to a desolate, desert wasteland
   - “Darkness, waters”: chaos, disorder
   - “Light”: period of daytime, not “photon”

2. Genesis 1:1-3 and ancient theomachy (‘battle of the gods’)
   - A common motif in Babylonian (Enuma Elish) and Canaanite (Baal Epic) cosmologies is that creation is the result of a great battle of the gods.
     - Babylon: Marduk vs. Tiamat (“the sea”)
     - Canaan: Baal vs. Yam (“the sea”)
   - Genesis 1:1-3 is a response to ancient cosmological theomachy.
     - Israel’s God has no rivals and simply speaks reality into being.
     - Israel’s God is depicted as a royal artist, not a bloodthirsty warlord.
   - We have evidence that ancient Israelites elsewhere adopted the theomachy motif to describe Yahweh’s power over creation.
Yet God my King is from of old, working salvation in the earth. You divided the sea [yam] by your might; you broke the heads of the dragons in the waters. You crushed the heads of Leviathan; you gave him as food for the creatures of the wilderness. You cut openings for springs and torrents; you dried up ever-flowing streams. Yours is the day, yours also the night; you established the luminaries and the sun. You have fixed all the boundaries of the earth; you made summer and winter.

PSALM 74:12-17

On that day the LORD with his cruel and great and strong sword will punish Leviathan the fleeing serpent, Leviathan the twisting serpent, and he will kill the dragon that is in the sea.

ISAIAH 27:1

3. The Seven Days of Genesis 1

- The debate over the word ‘day’ is motivated by an assumption called “concordism”: the idea that there must be agreement between the narrative of Genesis 1 and the modern account of world origins offered by science. That assumption violates the basic principles of human communication.
- In its ancient context, the seven-day structure communicated to the Israelite readers that the world is a cosmic temple from which the Creator rules over all creation.
- The seven days are part of a literary-artistic design. God brings order and symmetry out of chaos.
- Seven days was the duration of temple inauguration ceremonies in ancient Israel and Canaan, and Israel’s Sabbath cycle commemorated that story.

The seven days are not given as the period of time over which the material cosmos came into existence, but the period of time devoted to the inauguration of the cosmic temple. It is this inauguration and entrance of the presence of God to take up his rest that creates the temple. If the seven days refer to a cosmic temple inauguration, then Genesis 1 as a whole has nothing to contribute to the discussion of the age of the earth. This is not a conclusion designed to accommodate science—it was drawn from an analysis and interpretation of Genesis in its ancient environment. The point is not that the biblical text therefore supports the view of an old earth, but simply that there is no biblical position on the age of the earth. Viewing Genesis 1 in this way does not suggest or imply that God was uninvolved in the material origins of the universe—it only contends that Genesis 1 is not that story.

JOHN WALTON
THE LOST WORLD OF GENESIS 1: ANCIENT COSMOLOGY AND THE ORIGINS DEBATE
(INTERVERSITY PRESS, 2009), 92, 95-96.

The seven days of Genesis 1 are representative of a concept, not a measurement of literal temporal units. This is not to say that they are representative of longer or shorter periods of time, as they are not representative of time at all. Instead, they represent the consecration of what is ordered as a temple in an effort to convey a theological concept about God, humans, and the universe in which they reside.

B.C. HODGE
REVISITING THE DAYS OF GENESIS: A STUDY IN THE USE OF TIME IN GENESIS 1-11 IN LIGHT OF ITS ANCIENT NEAR EASTERN AND LITERARY CONTEXT [2010], 68.

4. Human origins in Genesis 1 and 2
- Each chapter offers a distinct statement about the nature and purpose of humanity. Neither chapter aims to offer a literal, scientifically oriented account of human origins.
- Notice the different chronological schemes in Genesis 1 and 2.
  - Genesis 1 – seven day framework: land > plants > animals > humanity
  - Genesis 2 – one day framework: land > man > plants > animals > woman
- Humanity in Genesis 1
  - Made on sixth day: pinnacle of creation
  - “Adam” is a title which includes male and female.
  - Made in the image of God: royal status.

It is the claim of Genesis 1 that God granted a royal-priestly identity as imago Dei to all humanity. Whereas power in the Babylonian and Assyrian empires was concentrated in the hands of a few, power in Genesis 1 is diffused or shared. No longer is the image of God applied only to a privileged elite. Rather, all human beings, male and female, are created as God’s royal stewards, entrusted with the privileged task of ruling on God’s behalf. This democratizing of the imago Dei in Genesis 1 constitutes an implicit critique of the entire royal and priestly structure of ancient Mesopotamian society.

J. RICHARD MIDDLETON
THE LIBERATING IMAGE: THE IMAGO DEI IN GENESIS 1
(BRAZOS PRESS, 2005), 204.
• Humanity in Genesis 2
  - Made on the same ‘day’ as all plants and creatures.
  - “Adam” is a title and name of a single male character.
  - “Formed” from dirt and animated with the divine breath, a common ancient creation motif.
    » In Babylonian accounts of human origins, humans are made from the dirt to be slaves for the gods.
    » In the Israelite account, humans are made from dirt and called to a dignified vocation of tending the garden.

5. The Bible and human origins: the main views
• The Archetypal View
  - Adam and Eve are literary and archetypal symbols for all humanity.
  - The story is about every human’s experience of temptation and moral failure.
• The Literal View
  - Adam and Eve were a real, historical couple.
  - The story explains how sin and spiritual death entered into the world.
• The Metaphorical View
  - The story describes a real event about the moral failure of the earliest humans, but it does so in a non-literal way with motifs and imagery common to ancient Israelite culture.
  - Adam and Eve represent a large group of the first homo sapiens. This view is known as polygenism.
  - Adam and Eve were the first homo sapiens to have evolved from earlier hominids. This view is known as monogenism; by the way, this was C.S. Lewis’ view, see The Problem of Pain, ch.5.
